

a) Ground truth shared backbone W0

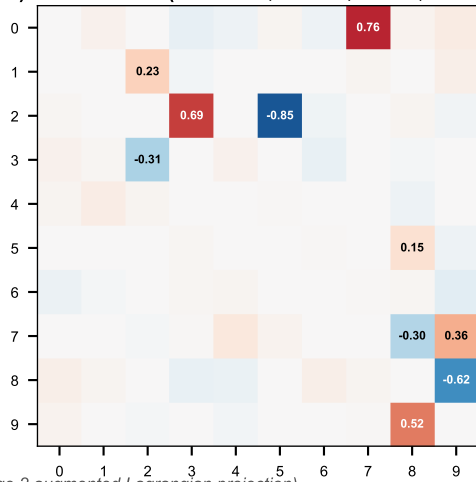

b) Ground truth Batch 1 (rewired 2,5 + new 0,7)

c) Recovered W0 (10/11 shared edges, $h=5.2e-6$)

d) Deviation D1 (rewired 2,5=-0.85, new 0,7=+0.76)

Recovery: 14/15 (93%). DAG constraint $h(W0) = 5.21e-06$ (Stage 2 augmented Lagrangian projection).
